Your Comments:

Dear EPA,

The cleanup plan relies too much on "natural recovery," or in other words, do nothing. That leaves pollution in the river in the hopes that it will either be covered over or flushed downstream. Not much of a solution!

Furthermore, creating a toxic waste disposal dump in the river is a non-starter. Toxic dredged sediments must be taken to an appropriate landfill, not dumped back into the river. How could any other solution even be considered?

Corporations and government agencies with liability for the pollution must be held accountable and pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.

Thank you for considering my comments.

Sincerely (b) (6)
